<b>Office Action Summary</b>	<b>Application No.</b> 10/566,919	<b>Applicant(s)</b> COX, MARC	
	<b>Examiner</b> Joanne Silberman	<b>Art Unit</b> 3611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moss et al. US #6,508,023 in view of England, US #3,010,246.
4. Moss teaches a display device comprising a stack of support elements including resilient means (column 4 lines 51-54) wherein the display is foldable from a first, upright position (Figure 2) to a second, folded (concertina fashion) position, as shown by Figure 5.
5. Moss does not teach the supported elements as being parallelepipeds, however such elements are well known in the art as shown by England. England teaches parallelepiped elements which are collapsible and are retained in their assembled shape by resilient member 43 (Figure 3). Diagonal layers 25 and 26 include tongues 36, 37 and slots 39, 40 (Figure 3). Tongues 36 and 37 support resilient member 43. It would have been obvious to a person having ordinary skill in the art to utilize

parallelepipeds as in England to support the display of Moss et al. so as to provide improved support for the display while still allowing it to fold.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 4235032, 3203124, 3234682 and 2833074 are cited as of interest.
